

be unequal and oppressive, and they declined to accept the grant upon that condition.

In the case of the lands granted to aid in the construction of the Detroit and Milwaukee railroad, and the Port Huron and Milwaukee railroad, the Board of Control were called upon to act, and made such disposition of the lands as in their judgment would secure their completion. Before any action was had in relation to the grant to the Detroit and Milwaukee railroad, the directors of that company passed a resolution, which I have filed with the Secretary of State, giving their consent to the alteration of their charter, and the imposition of a tax of three-fourths of one per cent, on the entire cost of their road, in lieu of all other roads benefited by land grants were placed upon a similar footing. I submit to you the propriety of passing such a law.

The St. Mary's Ship canal has now been in successful operation for four seasons, and no serious accident has befallen it. Our anticipations of the great advantages to be derived by opening an uninterrupted communication with the northern portion of our Peninsula, and furnishing facilities for convenient and ready transportation of its vast mineral wealth, are fully realized.

The business of the canal has steadily increased each year, and during the season of navigation of 1858, 9,944 tons of copper, 31,035 tons of iron ore, 2,597 tons of iron in blooms and bars, and 9,230 passengers passed through it. The tolls collected were \$10,848 80. I renew my recommendation that an appeal be made to Congress for an appropriation to preserve this great work from the hazard of destruction. The action of the frost in that high latitude upon its embankments, and the pressure of the waters of that great lake, subject to a rise of many feet, makes it necessary that every precaution should be used to prevent the calamity of its breaking away. A few thousand dollars timely and judiciously expended, would be likely to preserve an uninterrupted navigation for many years, and may save the expenditure of many thousands for repairs.

The administration which has just expired has endeavored to inculcate the principle, and give efficacy to it by their practice, that economy in the administration of public affairs is an indispensable virtue; and, in bearing my testimony to the faithfulness with which the State Officers associated with me have discharged their duty, I only render them an act of simple justice. For a compensation altogether inadequate, they have brought to the public service talents of a high order, and have devoted all their energies to subserve the interests and promote the welfare of the State.

Among the prominent measures which have passed the Legislature and received my sanction, within the last four years, and which will exert an important, and, I trust, beneficial influence upon the welfare and honor of the State, may be mentioned the General Railroad Law; the Act to establish the House of Correction; the acceptance and successful operation of the St. Mary's Canal; the energetic prosecution of the Asylums; the establishment of the Agricultural College; an Act to protect the personal liberty of the inhabitants of this State; the earnest remonstrance of the Legislature against the further extension of slavery; and the increase of slave States; the passage of the General Banking Law; the Act disposing of the grants of land for Railroad purposes; the Act providing for the sale of Swamp Lands, and the organization of a separate Supreme Court.

In surrendering the high trust to which I have twice been called by the suffrages of the people, and which has already passed, by the harmonious and beautiful operation of our government, into the hands of another, himself the choice of the people, I shall retire with a consciousness of having endeavored to contribute something to promote the prosperity of our beloved State, and I trust I shall ever cherish a grateful recollection of the honors that have been conferred upon me—and it only remains for me to invoke upon the labors, and those of my successor, the favor of that overruling Providence whose hand directs alike the destiny of individuals and of nations.

KINSLEY S. BINGHAM.  
Executive Office, Jan. 1st, 1859.

JACKSON COAL.—The several mines in the vicinity of Jackson are progressing finely, and the quality, quantity and profitable mining of the Jackson coal, is a fixed fact. The coal is used in the gas works of that city. It is also in common use by manufacturers and others.

CHANCES IN CROSSING THE ATLANTIC.—Statistics disclose the unpleasant fact to those intending to cross the Atlantic, that there is one chance out of eighty of their never living to get to the other side. For the last four years about 100,000 persons have made the trip—all told. In that time three trans-Atlantic steamers have been lost, with 1,200 lives. For the last twenty years the average loss of life is about one in a hundred.

**BE CONTENT.**

Mistaken mortal, ever fretting,  
Grasping, grinding, groaning, getting—  
Be content!

If thou hast enough, be thankful,  
Just as if thou hast a bankful—  
Be content!

If fortune cast thy lot but humble,  
Earn thy bread and do not grumble—  
Be content!

Have the rich, thinkest thou, no trouble—  
Twice thy wealth; their sorrows double—  
Be content!

List the lore of learned sages,  
Those wise men of the Grecian ages—  
Be content!

Their reek'ning up of all earth's riches,  
Was compassed in one short phrase, which is—  
Be content!

The rich man gets with all his heaping  
But dress, and drink, and food, and sleeping—  
Be content!

Though in the sleep the rich men gain not,  
Poor men sleep when rich men may not—  
Be content!

When winds about thy dust shall scatter,  
Where goes thy gold—to thee what matter?—  
Be content!

Remember, thou for wealth who rakest,  
"Nought thou broughtest, nought thou takest,"  
Be content!

**Every day Happiness.**

The ingredients of human happiness are few and simpler than men have supposed. To name them in the order of their importance they are—first a clear conscience, quite indispensable; second, somebody to love; and lastly folks and things. One can better dispense with all the rest than the first. And next to having somebody to love, is having something to do. Occupation serves as the chimney of a man's faculties, concentrating the fire and conducting away the smoke of his energies, which would otherwise burn, smother, and blacken all the inner chambers.

The young man imagines that to have wealth and fame and fine friends, will secure happiness. To compass these he is often tempted to turn atheist to the god of conscience and the angels of affection. But in the end he finds that, without love and without integrity, worldly power and prosperity prove swords without handles, and wounds the hand that grasps them.

To have learned, witty, and beautiful companions, is truly desirable; but they are not worth purchasing by any compromise of truth and duty; and with one whole friend near your heart, and one tender pair of arms familiar with your neck, you can afford to forget all of the rest. Italy and the Alps delight the soul; but happiness is in your own little garden, and the landscape before your door. The opera and the grand concert thrill and fascinate, but there is a purer and more lasting charm in the little evening circle, where some gentle hand at the piano awakes chords of harmony in your hearts also, or some loved voice pours out its tenderness in song. A rich and adorned mansion is pleasant, but a cabin where love abides is better than a palace and cold hearts. Servants to do your bidding is sometimes very convenient; but better still is a kind hand to smooth your pillow and your temper when you are ruffled, and a little girl to bring you a kiss with your slippers, when you go home weary from your work at night, and find something besides toast and tea needed to warm you. Gay pleasures will do for holidays, but a more homespun kind of happiness must be had for good every day wear.

**EXPOSE OF SPIRITUALISM.**—The "physical medium" George P. Paine, according to the N. Y. Post, has acknowledged that his table moving, &c., were done by the aid of fraud and deception. The "razor-strop man" and another person were instrumental in discovering and exposing the secret of a hole in the floor underneath the table to be moved, &c. Mr. Paine stated these facts in the New York Spiritual Conference on Wednesday of last week, in the presence of Mr. Paine; and, after he had concluded, the bogus medium got up, publicly acknowledged the fraud, and defended it on the ground that the end justifies the means. He believed that the greater share of the reputed spiritual phenomena are sham, although he was of opinion that some of them are real. He stood commended to his own conscience, and counted it among his treasures in heaven that he had charged nothing, although small presents had from time to time flown into his earthly coffers; his labors had been one of love. He had resorted to deception in order to meet deception, and ultimately expose it. Having defended his course, Mr. Paine exhibited a piece of No. 2 wire, as the veritable apparatus by which he had moved tables, and converted hundreds to spiritualism.

**A NEW ARRANGEMENT.**

**The "South" and the "States"**

**TO BE CONSOLIDATED.**

An arrangement has been concluded between R. A. Payson, editor of the Richmond South, and the proprietor of this paper, The States, by which the South and the States are to be consolidated into one paper, to be published in this city, in an enlarged form, and to be under the editorial control of Mr. Payson.

The paper will be the organ of no person or clique, but devoted to the general interests of the Democratic party, in accordance with the principles of State-right Democracy.

Mr. Payson will undertake the editorial control of the paper between the 20th of this month and the 1st of December.

It will be continued under the name of "THE STATES," and published on the following terms:

Postmasters who will forward us a club of subscribers to our Weekly for one year, at the club price, will be entitled to a copy of the Weekly States for one year.

All letters, in relation to the new arrangement, should be addressed to Payson & Hays, Washington, D. C.

Editors of Weekly Journals who will give the above a few insertions will receive our Daily in exchange during the coming session of Congress. [6w n1]

**CIRCULAR.**

THE *Detroit Free Press* has recently been improved in all its departments, with the purpose of making it a complete newspaper. In point of local, general and commercial intelligence, it is designed that it shall not be surpassed. It secures the latest advices by telegraph from all parts of the country, and the completion of the Ocean telegraph will enable it to lay before the reader in each daily issue the intelligence of events in Europe of the previous day. It maintains correspondents at Washington and Lansing during the sessions of Congress and the Legislature, and furnishes full reports of the proceedings of those bodies. Its reports of the markets are elaborate, and unwearied pains are taken to make them wholly trustworthy.—The *Free Press* is what it has always been in politics,—democratic. It is devoted to the doctrines of State Rights and Popular Sovereignty, and exerts its influence to ally sectional animosity and strife and to restore the fraternal relations of all the States. Touching State affairs, whatever the party in power, it insists upon frugal management and strict accountability of the public officers.

**The Detroit Daily Free Press**

Is issued every morning except Mondays, at Six Dollars per year, invariably in advance. It is printed on fine white paper, with new type, and contains from fourteen to eighteen columns of reading matter.

**The Detroit Tri-Weekly Free Press**

Is issued on Monday, Wednesday and Friday mornings, at Three Dollars per year, invariably in advance. It is the same size of the daily, and contains all the reading matter of that issue. It is designed more especially for country circulation and to the person who cares not for a daily paper, and yet is not content with a weekly, it is a most acceptable sheet. It furnishes the latest intelligence received by telegraph and the mails up to the hour of going to press.

**The Detroit Weekly Free Press**

Is published on Monday mornings, at One Dollar per year, invariably in advance. It is made up of the choicest matter of the daily issue, and contains the latest telegraphic intelligence and full market reports. But few advertisements are admitted into its columns, so that its immense amount of reading matter is furnished.—It is the cheapest weekly newspaper published in the West.

The mail facilities of the greater part of the Lower Peninsula have been so greatly improved by the completion of railroads that the *Free Press* reaches a very large number of post offices on the day of its publication.

**CAUTION.**—All Genuine Pills have the above Indian on Horseback, on each Box. Merchants and Traders will be on their guard and not be imposed upon by a Counterfeit of Morse's Indian Root Pills, signed A. B. Morse. All genuine Indian Root Pills have the name and signature of A. J. White & Co., on each box.

**DR. MORSE'S INDIAN ROOT PILLS.**

DR. MORSE, the inventor of Morse's Indian Root Pills, has spent the greater part of his life in traveling, having visited Europe, Asia and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from the impurity of the blood—that our strength, health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. Add how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountains and in Nature's garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sassafras, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty by throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives ease and double strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out healthily by the urinary or water passages, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find a way to every part, and completely re-cast and cleanse the system from all impurities, and thus the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the affected parts, and which will open the natural passage for the disease to be cast out; hence, a large quantity of food and other matter is lodged in the stomach and intestines, and is literally overflowing with the corrupted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Dr. Morse's Pills have added to themselves victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses have been taken, they were astonished, and absolutely surprised, in witnessing their effects. Not only do they give immediate ease and strength, but take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will so cleanse and purify, that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and happy life will cheer and brighten your days.
